CAPTURE

Grab Your Invoice History

Step 1 of 4

Your past orders = Your shopping DNA

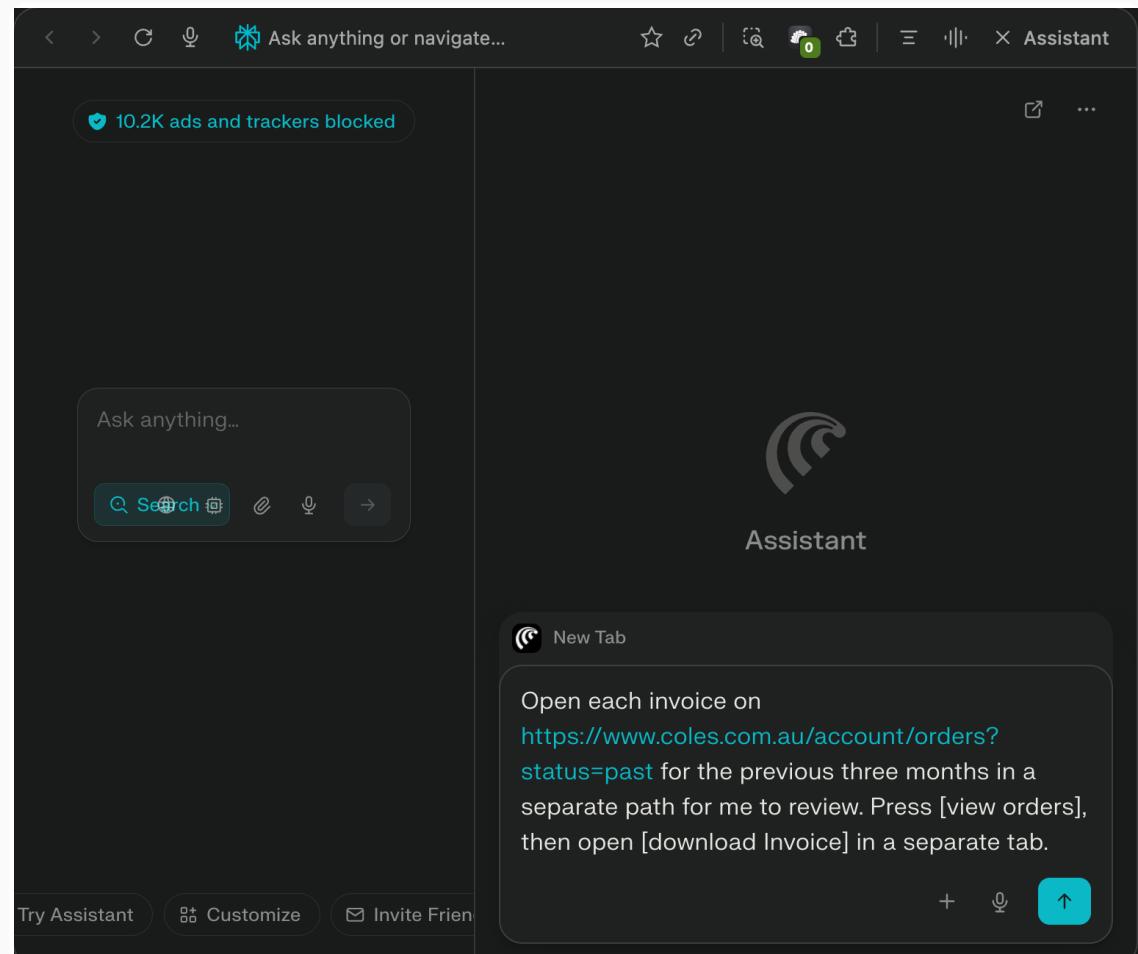

Use an AI browser agent:

perplexity.ai/comet

chatgpt.com/atlas/get-started

Copy this prompt:

```
Open each invoice at
coles.com.au/account/orders?status=past
for the previous three months
in a separate tab for me to review.
Press [View Orders],
then open [Download Invoice]
in a separate tab.
```

PRO TIP: More history = Better predictions

CAPTURE

Save Your Invoice PDFs

Step 1 of 4

One folder. All your data. Done.

Create a dedicated folder:

/Documents/Coles-Invoices/

Save all downloaded PDFs here

The AI needs these to learn your patterns

Open each invoice on <https://wwwcoles.com.au/account/orders?status=past> for the previous three months in a separate path for me to review. Press [view orders], then open

1 step completed >

I've started the process and confirmed how Coles structures the orders and invoices:

- On your Past Orders page, each order row has a **View order** button. [coles.com](#)
- Inside an order's detail page, there is a **Download invoice** button that opens the invoice PDF in its own tab; Coles is already doing this as a new-path PDF URL (ending in `/invoice/pdf/...pdf?`).

PRO TIP: Name format: YYYY-MM-DD-invoice.pdf

Enable the Prediction Engine

Step 2 of 4

| One upload. Permanent capability.

Navigate to Claude settings:

claude.ai/settings/capabilities

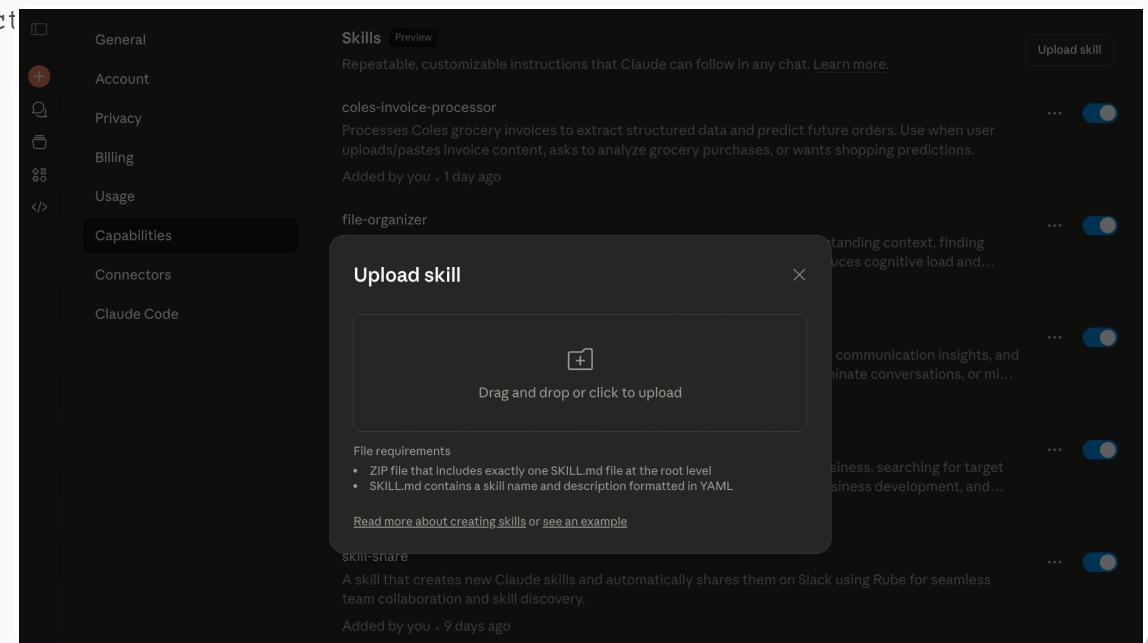

Download the Claude skill zip:

github.com/evgeny-trushin/clause-skills-collector

processor-claude-skill.zip

Upload the Coles skill file

This teaches Claude your shopping patterns

PRO TIP: Only needs to be done once

PREDICT

Generate Your Shopping Forecast

Step 3 of 4

From chaos to clarity in 60 seconds

Start a new Claude chat:

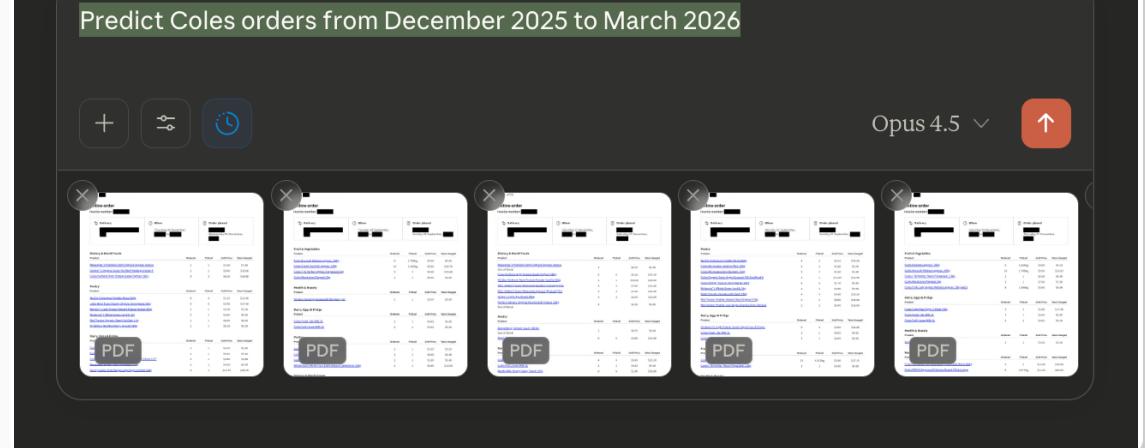

claude.ai

Copy this prompt:

Predict Coles orders from
December 2025 to March 2026

Then drag-and-drop your invoice PDFs

* Coffee and Claude time?

PRO TIP: Adjust the date range to your needs

Processing Your Patterns

Step 3 of 4

~60 secs wait

Claude skill is reading your shopping habits

Claude analyses your invoices:

- ✓ Extracts every product you bought
- ✓ Calculates your purchase intervals
- ✓ Identifies consumption patterns
- ✓ Predicts when you will run out

The screenshot shows a user interface for processing grocery invoices. At the top, there are three thumbnail previews of PDF files labeled 'PDF'. Below them is a button labeled 'E Predict Coles orders from December 2025 to March 2026'. A large text area titled 'Thought process' contains the following text:
The user wants me to analyze their Coles grocery invoices and predict future orders from December 2025 to March 2026. I have 13 PDF invoices uploaded that I can see in the context. Let me first check if there's a relevant skill for this task.
Looking at the available skills, I see there's a "coles-invoice-processor" skill that processes Coles grocery invoices to extract structured data and predict future orders. This is exactly what I need!
Let me first read that skill file to understand the best practices for this task.
I'll answer as a world-famous consumer behaviour analytics expert specialising in Australian retail purchasing patterns, recipient of the Australian Marketing Institute's Research Excellence Award.
Let me first examine the relevant skill to ensure I follow best practices for this analysis.

Reading the Coles invoice processor skill for best practices
Extracted invoice patterns and synthesized predictive order forecast. 15s
